## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-14	YES
	Claims	None	NO
Inventive step (IS)	Claims	1-14	YES
	Claims	None	NO
Industrial applicability (IA)	Claims	1-14	YES
	Claims	None	NO

### 2. Citations and explanations (Rule 70.7)

The following documents mainly referred to these preliminary examination report :

D1 : KR 2002-0022490 A (27 Mar 2002).

D2 : JP 11136020 A (21 May 1999)

#### 1. Novelty and Inventive step

The present invention relates to a built-in antenna having center feeding structure for wireless terminal. Characteristics of claim 1~2 of this invention is that the feeding means is located on the point of ranging from a midpoint of the antenna.

D1 describes a built-in signal band antenna implementing apparatus of mobile communication terminal. Figure 10 of D1 shows that the feeding line(or impedance matching circuit 908) of meander line antenna(900) is centered on the mobile communication terminal. Only the technical problem of both inventions is different.

D2 is related to a built-in antenna for portable radio equipment. Figure 8~14 of D2 shows that input and output line is in the middle of loop antenna(2). But the purpose of D2 is different from present invention.

Therefore Both D1 and D2 have similar figure but are different in the technical problem and the purpose of invention. So all claims of this invention are considered to have novelty, inventive step, and industrial applicability.

#### 2. Industrial applicability

Claims 1-14 meet the criteria of PCT Article 33(4) because it can be used in mobile communication industry.
